

## EMPLOYEE QUIZ A

---

Please copy this page and use it to test employees.

Name \_\_\_\_\_

Date \_\_\_\_\_

The following statements are True or False.

- \_\_\_\_\_ 1. The term Universal Precautions assumes that the blood and body fluids of all patients are infected with HIV, hepatitis and other bloodborne pathogens.
- \_\_\_\_\_ 2. We can legally refuse treatment if someone identifies themselves as having a bloodborne disease such as Hepatitis C or HIV.
- \_\_\_\_\_ 3. High level disinfection is a chemical or physical procedure that destroys all microorganisms including a substantial number of resistant bacterial spores.
- \_\_\_\_\_ 4. OSHA looks after the safety and health of employees and patients.
- \_\_\_\_\_ 5. The virus that causes HIV has a "kill-time" that requires longer contact with a disinfectant than the Hepatitis B virus.

Complete the following statements:

- 6. All employees at risk of exposure to blood must be offered the Hepatitis B vaccination within \_\_\_\_\_ working days.
- 7. Hand washing with antimicrobial soap and water and the use of \_\_\_\_\_ is a important factor in preventing the spread of dangerous germs.
- 8. Having a well supplied spill kit is essential in healthcare for infectious fluid management and chemical spill cleanup. **1910.1030(e)(2)(ii)(K)** *All spills shall be immediately contained and cleaned up by appropriate professional staff or others properly trained and equipped to work with potentially concentrated infectious materials. Equipment must include at the minimum:*  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
- 9. Immediately report all bloodborne exposure incidents to \_\_\_\_\_.
- 10. Chapped or non intact skin, the mucous membranes of the nose and mouth, and the eyes are all possible routes of entry for \_\_\_\_\_.

## EMPLOYEE QUIZ B

---

*Please copy this page and use it to test employees.*

Name \_\_\_\_\_  
Date \_\_\_\_\_

### **Multiple Choice - Choose the best answer or answers for each question.**

1. After being vaccinated against Hepatitis B and after a positive titer (you developed antibodies), booster shots are required:
  - A.) Every 3 years
  - B.) Every 5 years
  - C.) Every 7 years
  - D.) Never (life-long immunity)
  
2. Which of the following are true statements about Hepatitis C:
  - A.) There is no vaccination available for Hepatitis C
  - B.) 80% of persons infected have no signs or symptoms
  - C.) Approximately 1 in 50 American adults are infected
  - D.) All of the above
  
3. Other potentially infectious materials (OPIM) include (but are not limited to):
  - A.) Urine
  - B.) Semen & vaginal secretions
  - C.) Cerebrospinal fluid
  - D.) Amniotic fluid
  - E.) All of these
  
4. Engineering controls include:
  - A.) Sharps containers
  - B.) Sharps with built-in safety controls
  - C.) Gloves, masks, eye protection
  - D.) All are correct
  
5. Evaluation and implementation of safer needles are required for:
  - A.) Practices that have multiple needlestick injuries within 12 months
  - B.) Only for large medical facilities and hospitals
  - C.) All facilities regardless of size or needlestick history
  - D.) For practices seeing more than 50 patients a day

### **The following statements are True or False.**

- \_\_\_\_\_ 6. Disposable sharps containers can be emptied and re-used when the contents reach the "Fill Line" (near the top).
- \_\_\_\_\_ 7. Hepatitis B and C can result in serious liver damage.
- \_\_\_\_\_ 8. Nasal secretions, urine and vomit are defined by OSHA as infectious materials.
- \_\_\_\_\_ 9. Under Hazard Communications, once a product is taken out of its original container, it is your job to ensure that **all** secondary containers have labels that identify the contents, name of the manufacturer and appropriate hazard warnings.
